

Experts in Engineering and Commissioning

Inerchem LLC is a **Technical Consulting and Hands-on Performance Engineering** firm focused on providing **engineering design, process optimization, commissioning** to the power industry and water-desalination facilities worldwide.

We are problem-solving specialists with a proven professional track record in state-of-the-art commissioning startup of industrial plants.

Our Specialties

Commissioning Management – Engineering Design – Water Technologies – Analysis of Failures

"Driven by Perseverance & Grit"

Technical Services

Engineering Services

- ✓ Process Optimization (Computational Fluid Dynamics, Process Simulations)
- ✓ Engineering System Design (Process, Mechanical, Piping)
- ✓ Conceptual Engineering
- ✓ Performance Models
- ✓ Procurement Support
- ✓ Equipment Specification QA/QC
- ✓ Engineering support for bidding
- ✓ Hydraulic Calculations

Water Technologies

- ✓ Commissioning of Desalination Plants
- ✓ Water Conditioning
- ✓ Chemical Treatments
- ✓ Failure Investigations & Troubleshooting
- ✓ Boiler Tubes & Heat Exchangers Inspections
- ✓ Corrosion Mechanism Identification

Commissioning Services

- ✓ Project Development
- ✓ Commissioning Management
- ✓ Technical Advising

Areas of Development

- Refineries
- Combined Cycles
- Desalination Plants
- Thermal Solar Plants
- Biomass Power Plants
- Recovery Boilers
- Waste to Energy Power Plants
- Cogeneration Plants

Commissioning Management – Engineering Design – Water Technologies – Analysis of Failures

Our Mission

Our purpose is to apply well-founded experience to power industry which helps our clients to create a more robust and reliable energy projects.

We characterize our know-how as ingenuity, drive, and the perseverance essential for success
